

Project Brief

Western Tooele EA; SR-112 to SR-36

**2007 Legislative
Update**

Provided By:

Project Description: STUDY, Environmental Assessment, Local Government

In order to meet the transportation needs associated with planned growth and development in the northwest part of Tooele, the City is proposing to construct a new east-west arterial, known as the Northwest Tooele Connector. The connector would be designed to function and complement existing local land use and transportation plans.

Following scoping in January 2005, the City, in coordination with UDOT and FHWA, began an Environmental Assessment of project alternatives. The Environmental Assessment Document (EA), which includes an evaluation of two build alternatives, was released for public review on October 12, 2006. Following the November 17, 2006, close of the public comment period, the City, UDOT, and FHWA will evaluate comments received and reach a decision about the document and project. If FHWA makes a Finding of No Significant Impact, the City will move forward with final design and project construction.

**Commission
Approved
Project Budget:**
\$450 thousand

**Anticipated
Schedule:**
Decision Document: -
Winter 2007

Project Contacts:

Randy Park
